

Check for Mistakes in this Word Problem: offscreen?

Directions: Write a function, `offscreen?`, which returns true if Sam the butterfly's x-coordinate is less than -50 or greater than 690.

Contract and Purpose Statement

Every contract has three parts...

<code>;</code>	<code>offscreen?</code>	<code>:</code>	<code>number</code>	\rightarrow	<code>boolean</code>
			<small>function name</small>	<small>domain</small>	<small>range</small>
<code>;</code> Given an x-coordinate, returns true if the coordinate is less than -50					<small>what does the function do?</small>

Examples

Write some examples, then circle and label what changes...

<code>(EXAMPLE(</code>	<code>offscreen?</code>	<code>60</code>	<code>)</code>	<code>(true)</code>	<code>)</code>
		<small>function name</small>	<small>input(s)</small>	<small>what the function produces</small>	
<code>(EXAMPLE(</code>					<code>)</code>
<code>(EXAMPLE(</code>					<code>)</code>

Definition

Write the definition, given variable names to all your input values...

<code>(define(</code>	<code>off-screen</code>	<code>x-coord</code>	<code>)</code>
	<small>function name</small>	<small>variables</small>	
<code>(and (< x-coord -50) (> x-coord 690))</code>			<small>what the function does with those variables</small>
